

SPC MADE IN GERMANY
100% RECYCLABLE

Authentic floors made with respect for nature.

SPC MADE IN GERMANY

„SPC Made in Germany“ is a new revolutionary concept 100% Made in Germany by CLASSEN. With respect for our planet, we developed a unique raw material based on stone powder and minerals. The result is a unique collection with authentic and beautiful designs.

SPC MADE IN GERMANY

The Kaisersesch plant is the CLASSEN Group's competence and production site for SPC, design & vinyl, wall and floor coverings. Our unique technology makes it possible to produce a 100 % recyclable concept with the best designs and a perfect quality and finish.

From the production of the raw materials up until the extruding of the boards, from digital printing technology to the strong top layers, milling our easy-to-install locking system and preparing the products for shipment, the entire process is vertically integrated in our modern factory.

Because we care about everyone's good health and wellbeing, and want to assist slowing down the climate change.

100 % RECYCLABLE

We are able to recycle Rigidfloor and give it a second life, in our own production or in the garden furniture, automotive bumpers or packaging items.

CLASSEN CLOSE THE LOOP

CLASSEN is aiming for a 100 % integrated cycle of using and re-using the accurate selected raw materials by closing the loop in our production process.

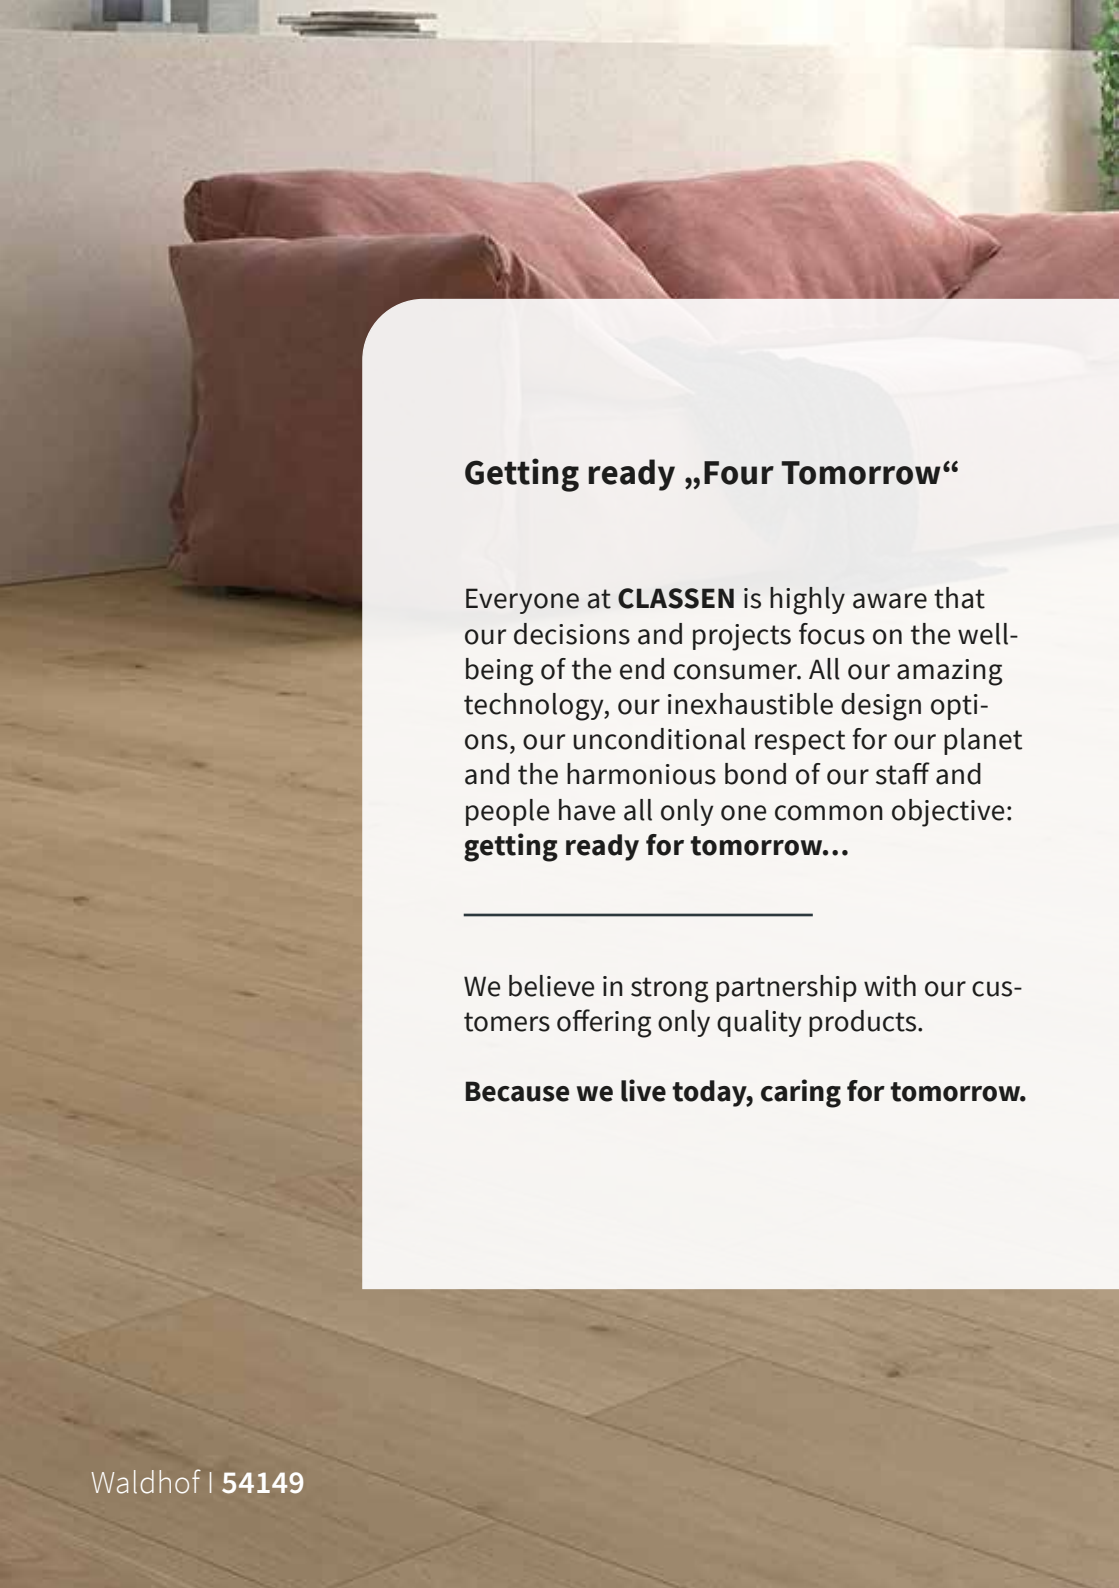

CO² NEUTRAL ELECTRICITY SUPPLY

Due to the use of green electricity and the participation in CO² projects, we are completely CO²-neutral when it comes to energy purchases at our Kaisersesch site in 2020!

MAXIMUM DESIGN

Due to our unique digital printing technology, we are able to create 100 % authentic designs with a huge variety of planks up until 24 different planks per décor.

Getting ready „Four Tomorrow“

Everyone at **CLASSEN** is highly aware that our decisions and projects focus on the well-being of the end consumer. All our amazing technology, our inexhaustible design options, our unconditional respect for our planet and the harmonious bond of our staff and people have all only one common objective: **getting ready for tomorrow...**

We believe in strong partnership with our customers offering only quality products.

Because we live today, caring for tomorrow.

Technology

Since we became a manufacturer, we always focused on the best machinery, on efficiency and on maximum output. The business model of the CLASSEN Group is based on permanent investing in capacity and unique production concepts.

Design

Design matters. We want to differentiate and develop the most beautiful products, on design, texture and finish. Our in-house design centre is the creative soul of our company. Preparing the design solutions for tomorrow.

People

Our people are the engine of our success! From the factory engineers, to the administrative teams. From our sales force to our machine operators, at CLASSEN we strive for a homogeneous team spirit with one common goal: being the best in what we do, to create and deliver. Every day again.

Planet

Whether laminate flooring or design- & vinyl-, wall and flooring, creating durable products are a fundamental part of our company vision. Sustainable forestry management, generating our own energy, emission-low products, 100% recyclable, close the loop production processes...

ONE CONCEPT

Within the SPC Made in Germany collection, we offer four options, all 100 % recyclable. Either you choose 3,6 mm Rigidfloor, our contemporary collection of commercial oak designs with the optional choice for the 3,6+1 mm Rigidfloor+ including attached XPO backing.
